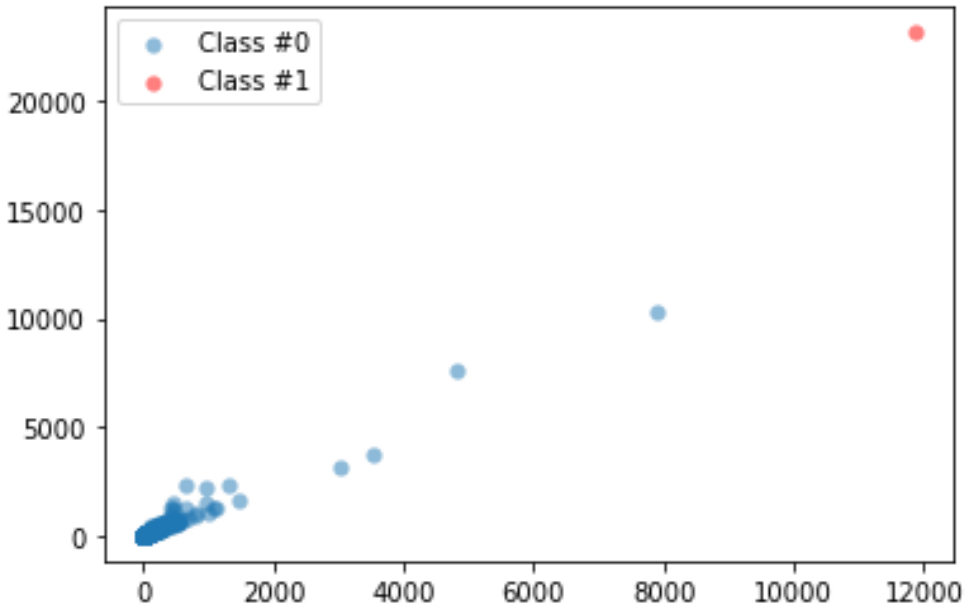
Misbah Fahamsyah • Data Scientist | Data Analyst

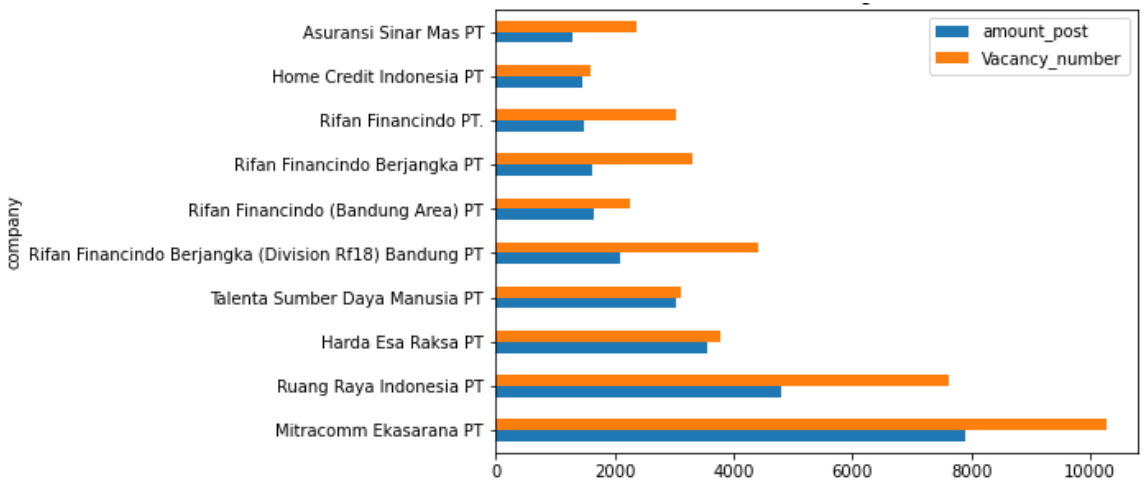
FRAUD DETECTION

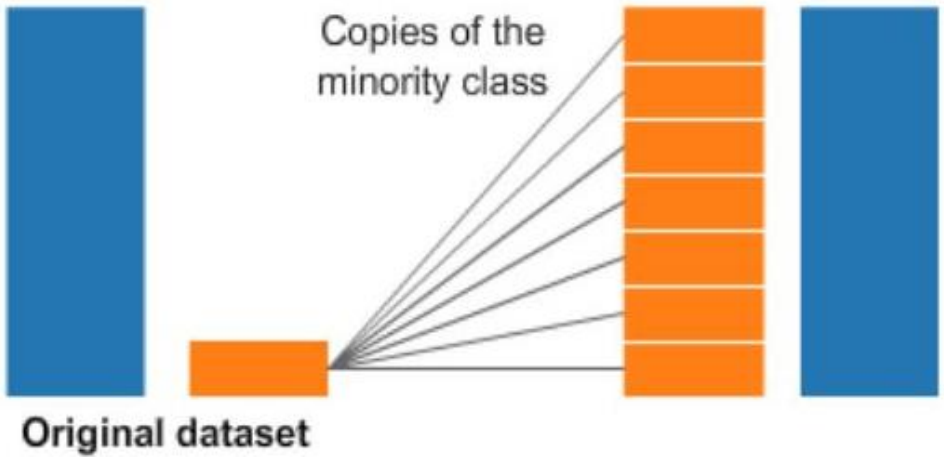


FRAUD DETECTION in JOB VACANCY

- Categorical and numerical data
- Fraud detection in imbalance class
- Using over-sampling
- Machine Learning with Logistic Regression
- Visualization with Python
- Validation models using confusion matrix, accuracy, precision, recall, dan F-score

Programs : **Python**, **Ms.Excel**



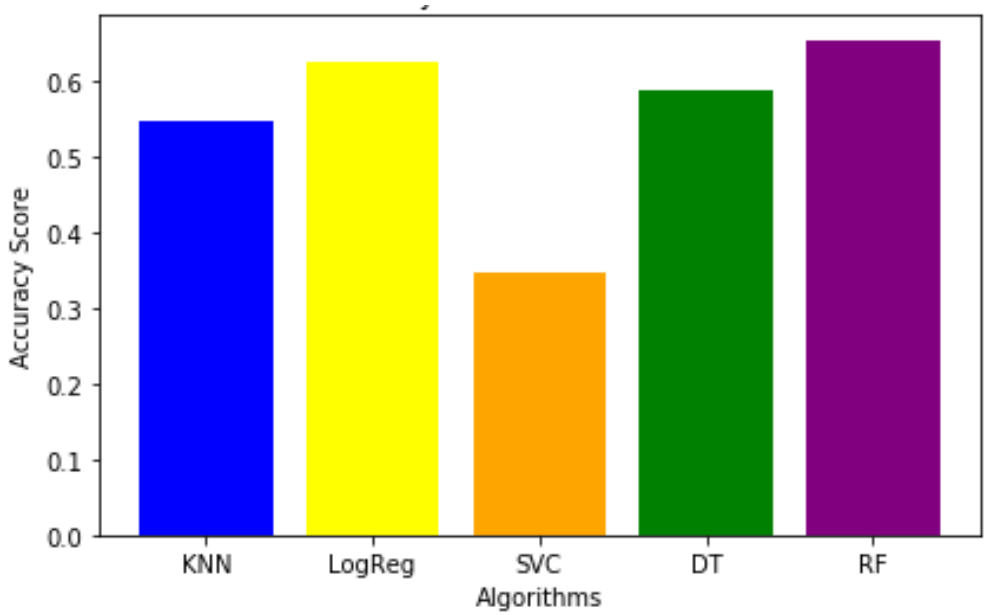


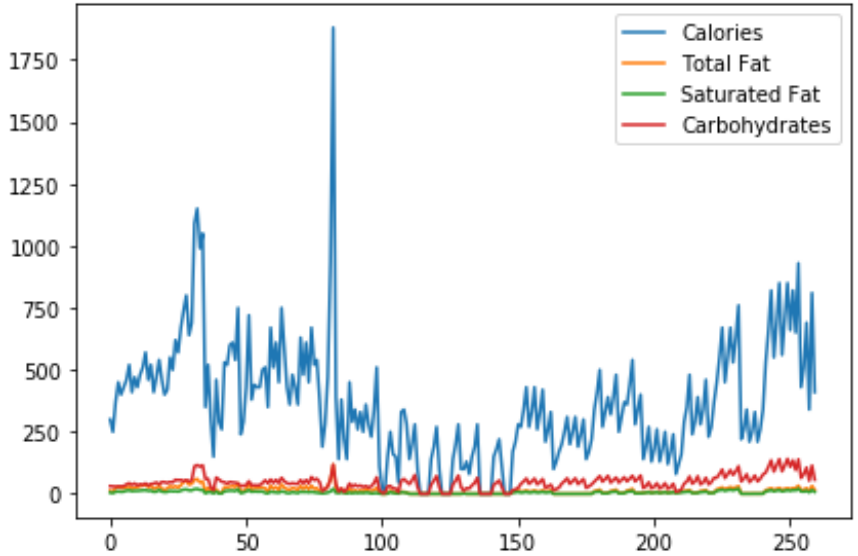
PREDICTION

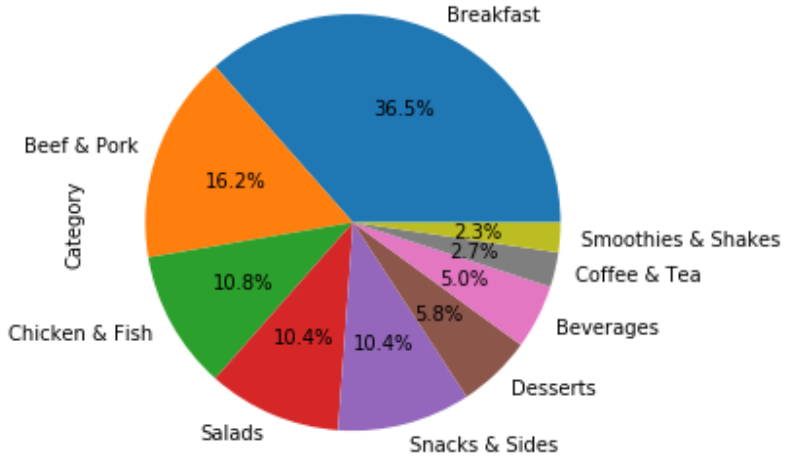
PREDICT THE CATEGORIES in McD's MENU

- Categorical and numerical data
- Prediction using classification models
- Machine Learning with KNN, Logistic Regression, SVC, Decision Tree, and Random Forest
- Visualization with Python
- Validation models using accuracy

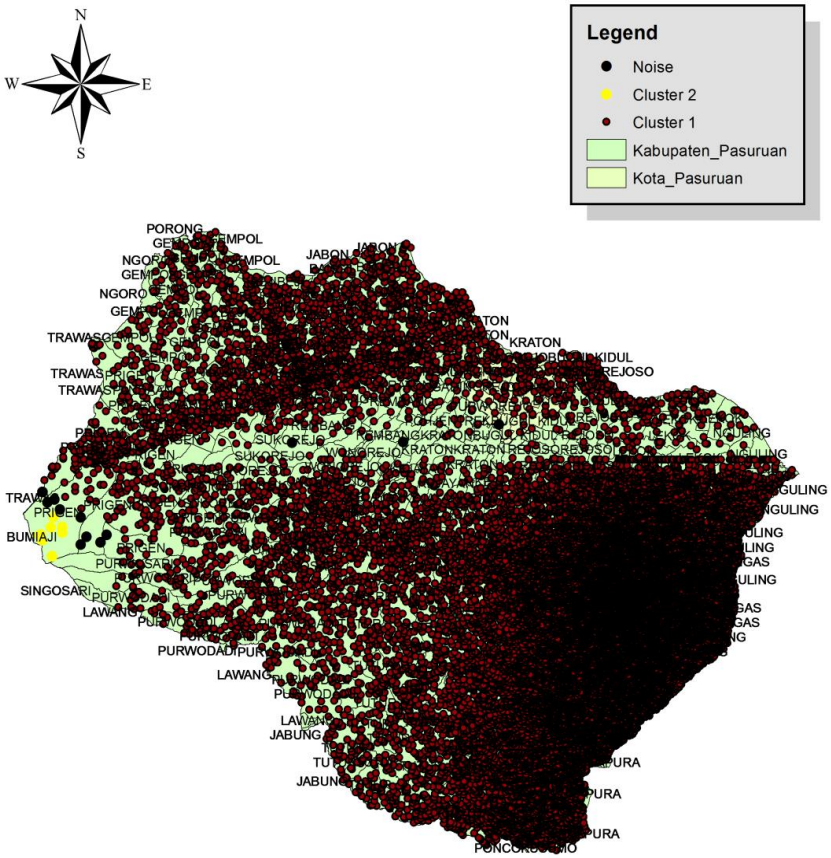
Programs : **Python**







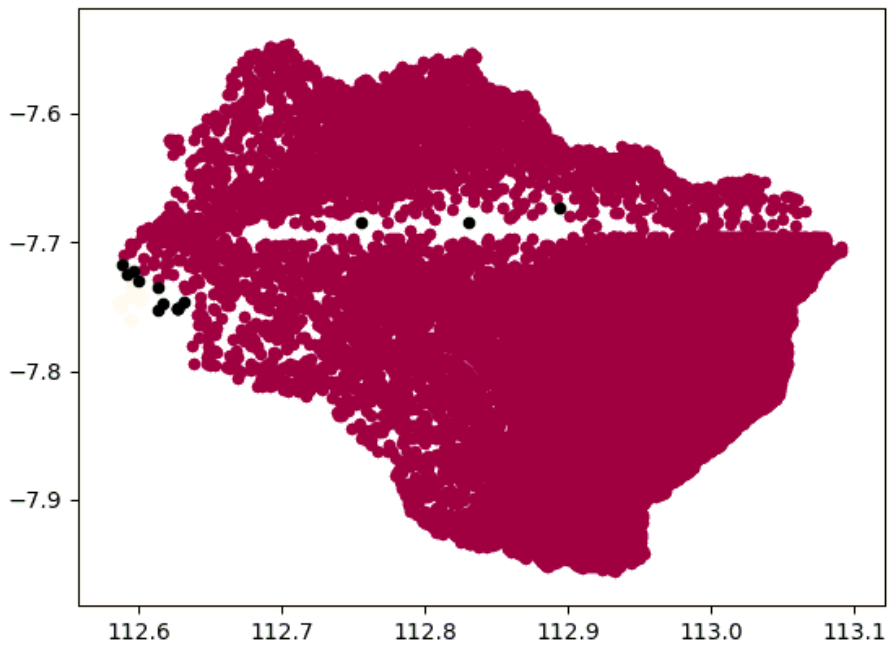
DBSCAN



LIGHTNING ANALYSIS USING DBSCAN

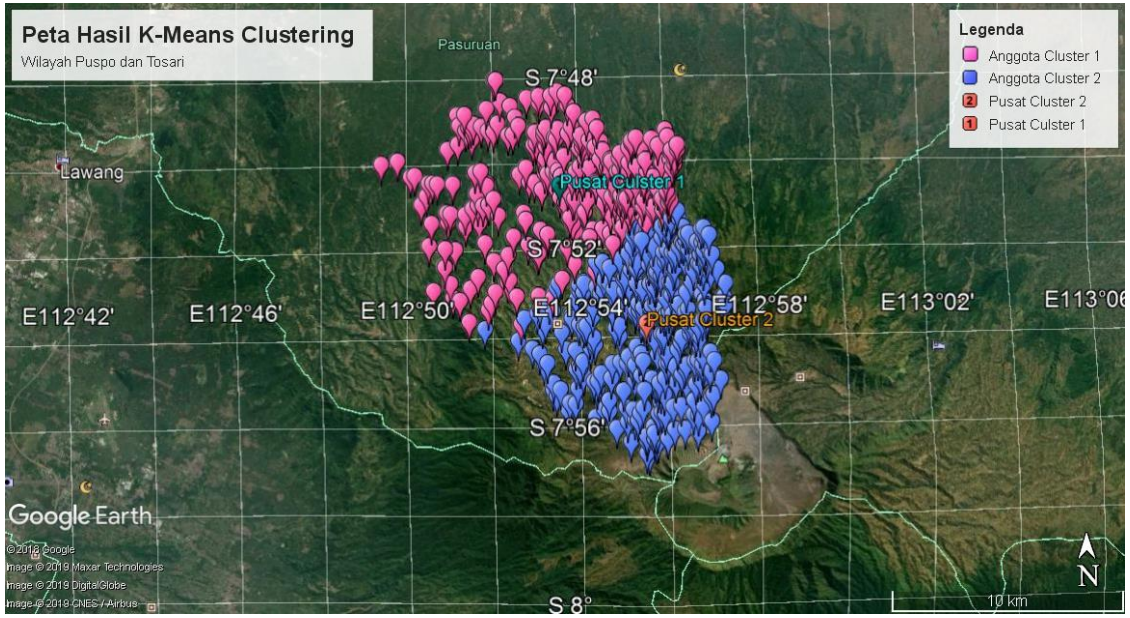
- Geospatial data
- Pre-Analysis using descriptive statistics
- Machine Learning with DBSCAN Clustering
- Visualization with Python and ArcGIS
- Validation model using silhouette score

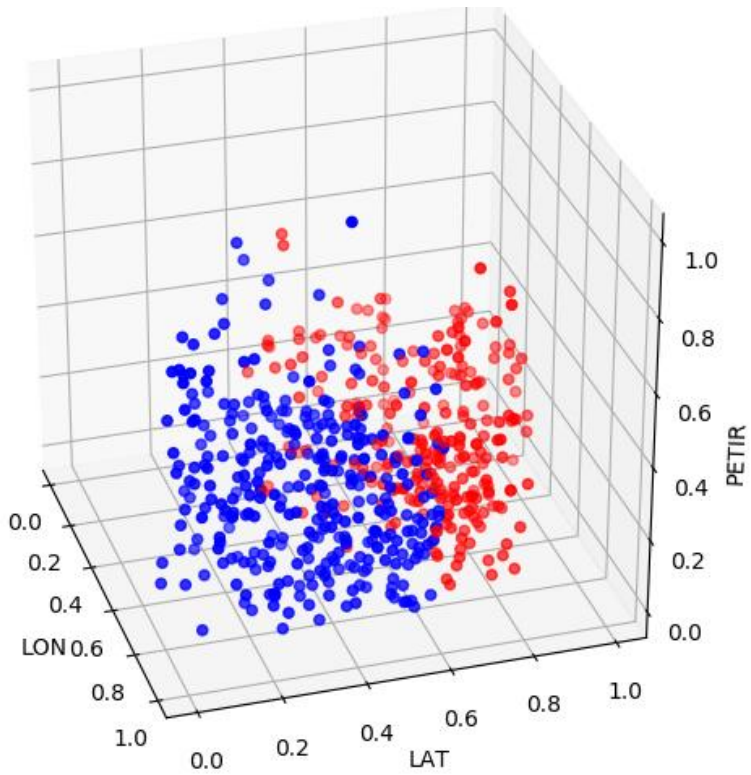
Programs : **Python**, **ArcGIS**, **Ms.Excel**, **SPSS**



K-MEANS

LIGHTNING ANALYSIS USING K-MEANS CLUSTERING

- Geospatial data
- Transformation with MinMaxScaler
- Machine Learning with K-Means clustering
- Visualization with Python and ArcGIS
- Validation model using silhouette score




- Programs : **Python**, **Ms.Excel**, **ArcGIS**
